“Eco-friendly tableware mothers trust and choose”

Plant eco_friendly resin PLA sources CO₂ during manufacture and harmless to human body. It is the eco-friendly tableware that returns to the nature during disposal so it is safe to infants and children who put the objects they contact for the first time into their mouth instinctively.

BPA FREE

You don't need to worry about green mom_i products, because it is made with corns and there's any harmful materials like endocrine disruptor, cancer-causing agent, and heavy metal.

NONTOXIC INK

You don't have to worry about if your baby suck or lick green mom_i product, because the design that printed with nontoxic ink. We didn't put the design on the parts, where baby could touch it with mouth or the food could reach for making a safer meal time.

Microwave/ Dishwasher/Boiling hot water

Green mom_i, which has an excellent thermal resistance that could stand in the high temperature is created with a long period of research at the mom_i research laboratory. Green mom_i is easy to use because it is available to be used in the microwave, dishwasher, and you can also boil it.

Perfect biodegradation

Unusable green mom_i products completely return to dust after buried in the soil, because microbes biodegrade them. However, the speed of biodegradation could have differences in the microbial environment in the soil and the type of the dishes.

Less CO²

Green mom_i doesn't create CO² in the middle of the process of manufacturing the materials because the raw materials come from the nature, and it also doesn't harm the global environment because we don't use the petroleum chemicals, the exhausted resource.

Sturdy Products

It is hard to break green mom_i product, because its quality isn't falling behind other plastic products, which made with the petro-chemistry, even though it was made with corns.

Product

- Our love for the nature and kids is well expressed through our product.
- Our product lines are eco-friendly minimizing the emission of co2 during the manufacturing processes and resulting in no environmental hormone.
- Our several years' worth of expertise makes it possible for us to express beautiful colors loved by little kids without using any policy.

FINGER BRAIN **Gears**

Finger Brain Gears Building Set

By using the principles of gear rotation, the Fingerbrain Block Building Set is an educational toy which develops children's creativity and the ability to think, and at the same time their technical abilities to handle various blocks. The Fingerbrain Block Building Set is designed for children either to build structures following the blueprint of the ones that are already built by using various colored blocks, or to build their original buildings using their own thoughts and creativity. By using Fingerbrain Block Building Set, children will experience a sense of accomplishment when their output moves by the principles of gear rotation, which will lead to the development of their creativity, concentration, and the ability to solve problems.

Fingerbrain Block Building Set sold by Tonature Corp. has great quality and educational effects which gives the set a world-wide reputation, and has profusion of awards given to renowned products at US and UK.

Features of Finger Brain Gears block

1. Dynamic blocks having the differentiated educational learning function compared to static block products focusing only on building.
2. Blocks having the excellent educational function that cultivates the three-dimensional thinking skill when children make various models by applying the rotation principle of the gear.
3. Blocks having the originality which lets children realize the principle of the gear by themselves through the play.
